Stronger at Every Phase of the Project

In the evolving energy landscape, Intium offers comprehensive services to navigate the complexities of emerging energy projects. Our expertise spans every stage, providing clients with delivery certainty by understanding how these stages interrelate.

Advisory Services

We work with you in a way that works for you.

We guide clients through all of these stages, offering insights to maximise delivery certainty by navigating complexities efficiently.

Logistics & Supply Chain

We navigate supply chain complexities and lead with quality providers.

Our robust supply chain relationships and warehousing capabilities ensure ready access to a vast inventory of spare parts, enabling us to efficiently maintain physical assets. Our established network of credible service providers, subcontractors, and OEMs is a testament to our unwavering commitment to quality.

Construction & Commissioning

We construct with commissioning and testing in mind.

We ensure construction aligns with project goals and regulatory standards, overseeing quality control, timelines, and safety. Our approach guarantees a seamless transition from construction to commissioning.

Engineering & Design

We engineer and design with commissioning, testing and operations in mind.

Our engineering and design services ensure timely, network-compliant designs that meet commissioning requirements. By adhering to rigorous standards, we save time and money, guaranteeing project success.

We offer end to end support in the delivery of large projects and industry transforming energy solutions.

With deep knowledge and expertise in emerging energy services including grid connections. We advise on every phase of a project, from initial concept through to operations and maintenance, ensuring meticulous planning and efficient execution.

Operations & Maintenance

We operate and maintain with a focus on longevity and reliability.

We manage the ongoing maintenance and operations of energy projects, ensuring long-term success through detailed planning, risk management, and coordination with stakeholders.
